SUMMARY

Software Engineer with 4+ years of experience designing, building and shipping production web, mobile and backend software: Angular, React, Next.js and TypeScript on the frontend; REST services on Node.js and Python (FastAPI); cross-platform mobile with React Native and Flutter; and LLM evaluation and RLHF — prompt design, rubric-based review, and human feedback on model responses. Lead engineer on Whistler's mobile app, web client and admin dashboard; frontend engineer on SeamHealth's Clientshot platform.

EXPERIENCE

`2025 — Present`
Remote

Mobile & Frontend Engineer

Whistler

Lead engineer on the Whistler mobile app; built the Whistler Admin dashboard and the Whistler Web client.

- Lead engineer on the React Native + Expo app on Google Play: feeds, moments, realtime chat over Socket.IO, events, leaderboards and tiers, and community insight dashboards.
- Built an on-device fastText interest classifier in pure JavaScript — 30 categories, offline, no native modules.
- Push notifications (FCM + Notifee), deep linking, Google / Apple / Facebook sign-in, theming and dark mode; Sentry, Mixpanel and Firebase Analytics.
- Built Whistler Web: a Next.js 16 client with 52 routes, server-side route protection, 23 unit test files, Playwright e2e and signed Docker images.
- Built Whistler Admin: React 19, TypeScript, TanStack Query and Table, Zustand and Recharts, with GitHub Actions CI and a signed Vercel webhook.
- Release management: Gradle Android builds and EAS over-the-air channels for development and production.

Frontend / Full-Stack Engineer

SeamHealth Group

Frontend engineer on the Clientshot platform; lead contributor on Clientshot Public, the Device Intelligence backend and the SeamHealth blog.

- Clientshot: 416 commits across the customer app, admin console and v3 — form flows, complaint workflows, billing, notifications and operator tooling (Angular, TypeScript, RxJS).
- Clientshot Public: largest contributor (36 of 71 commits) — React 19 and TypeScript, real API integration, and all 88 test files.
- Device Intelligence: wrote the initial FastAPI backend for device fingerprinting and risk scoring, hardened it for production and scaffolded the AWS ECS + RDS deployment.
- SeamHealth blog: initial Next.js 16 + Sanity implementation with rate limiting, CSP, structured logging and CI.

- ELSRT: real-time validation and error handling for lab data entry — manual verification time down by an estimated 30%.
- Reusable component libraries adopted across 3+ internal products; weekly PR review across Angular and React — post-release defects down by an estimated 25%.
- LLM evaluation and RLHF: prompt design, rubric-based review, data annotation of model responses, human feedback on those labels, and hallucination and inconsistency flags.

2022 — 2023
Abuja, Nigeria · Hybrid

Software Developer

Nigeria Civil Defence Corps HQ

Built and maintained internal web applications.

- Developed and maintained internal web applications in Angular and React.
- Built reusable UI component libraries — new-feature development time down by an estimated 15%.
- Reviewed peer code against internal engineering standards before deployment.
- Turned stakeholder requirements into technical specifications and acceptance criteria.

SKILLS

Frontend
React, Angular, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, TanStack Query, Zustand, RxJS, Component architecture, Accessibility, Responsive systems

Backend
Node.js, Python, FastAPI, Express, REST APIs, JWT, RBAC, PostgreSQL, MongoDB, Caching, Validation, WebSockets, SQLAlchemy + Alembic, Docker, AWS (ECS, RDS)

Mobile
React Native, Expo, Flutter, Offline-first architecture, Push notifications, Deep linking, Native integrations, Play Store / App Store deployment

AI / LLM
LLM evaluation, RLHF, OpenAI and Anthropic APIs, Prompt engineering, Response evaluation, Data annotation, RAG fundamentals, Hallucination detection, On-device classification, Model behaviour analysis

Engineering practice
Git and GitHub, CI/CD (GitHub Actions), Docker, Testing (Vitest, Playwright, pytest), Code review, Documentation, Agile / Scrum, Observability, Product analytics

---

EDUCATION

B.Sc. Computer Science — Nasarawa State University, Keffi, 2023

WASSCE — Priestly College, Romi, Kaduna, 2016
